re: Biogen Building 6 (12 Cambridge Center)  
Bulk Gas Storage Upgrade  
SA Job No. 76304.00

Dear Mr. Zogg,

Please find the enclosed materials for the Design Review Committee meeting on 21 March 2018. We have enclosed three renderings, a site plan, an elevation drawing of the proposed fence graphics, and a cut sheet for the proposed louver fence. We have made the changes discussed at our meeting on 23 February 2018 as listed below.

1. The fence height has been increased to 10 feet to block the view of the smaller carbon dioxide tank. The taller nitrogen tank as well as the vaporizer will still be taller than the fence, however, the vaporizer will not be visible from the adjacent walkway as shown on the section on sheet L1-01.
2. The graphics have been removed from the nitrogen tank.
3. The louver fence has been changed to 100% visual obscurity.
4. Graphics have been added to the fence. The graphics are designed to match the graphics on the nearby "blue garage", but have been shown as a monochrome color scheme. This was done to more closely match the colors of the building and to reduce the intensity of the colors adjacent to the walkway.

Please let us know if you have any questions or comments about this material. We look forward to meeting with you next week.

Sincerely,

A handwritten signature in blue ink, appearing to read 'S. Engler', written in a cursive style.

Steven G. Engler, PE  
Senior Associate
