Subject: comment on bike lanes

Message: Hello! I see the renders you have for the grade separated bike lanes on broadway, main, and third. I like this plan cause it properly separates bike traffic from cars and makes it safer for all. I also like that you guys are grade separating the bikes rather than using flex posts (they look kind of bad and don't do a great job). On main street I don't think the center running bike lanes is a good idea, I'd rather see it (and would be more comfortable using it) if it sticks to having the grade separation on the side. Thanks!
